

WEB SCRAPING – ASSIGNMENT 2

Instructions

1. All the questions must be done in a single Jupyter notebook.
2. There should be proper comments in code.

Q1: Write a python program to scrape data for “Data Analyst” Job position in “Bangalore” location. You have to scrape the job-title, job-location, company_name, experience_required. You have to scrape first 10 jobs data.

This task will be done in following steps:

1. First get the webpage <https://www.shine.com/>
2. Enter “Data Analyst” in “Job title, Skills” field and enter “Bangalore” in “enter the location” field.
3. Then click the search button.
4. Then scrape the data for the first 10 jobs results you get.
5. Finally create a dataframe of the scraped data.

Note: All of the above steps have to be done in code. No step is to be done manually.

Q2: Write a python program to scrape data for “Data Scientist” Job position in “Bangalore” location. You have to scrape the job-title, job-location, company_name. You have to scrape first 10 jobs data.

This task will be done in following steps:

1. First get the webpage <https://www.shine.com/>
2. Enter “Data Scientist” in “Job title, Skills” field and enter “Bangalore” in “enter the location” field.
3. Then click the search button.
4. Then scrape the data for the first 10 jobs results you get.
5. Finally create a dataframe of the scraped data.

Note: All of the above steps have to be done in code. No step is to be done manually.

Q3: In this question you have to scrape data using the filters available on the webpage

You have to use the location and salary filter.

You have to scrape data for “Data Scientist” designation for first 10 job results.

You have to scrape the job-title, job-location, company name, experience required.

The location filter to be used is “Delhi/NCR”. The salary filter to be used is “3-6” lakhs

The task will be done as shown in the below steps:

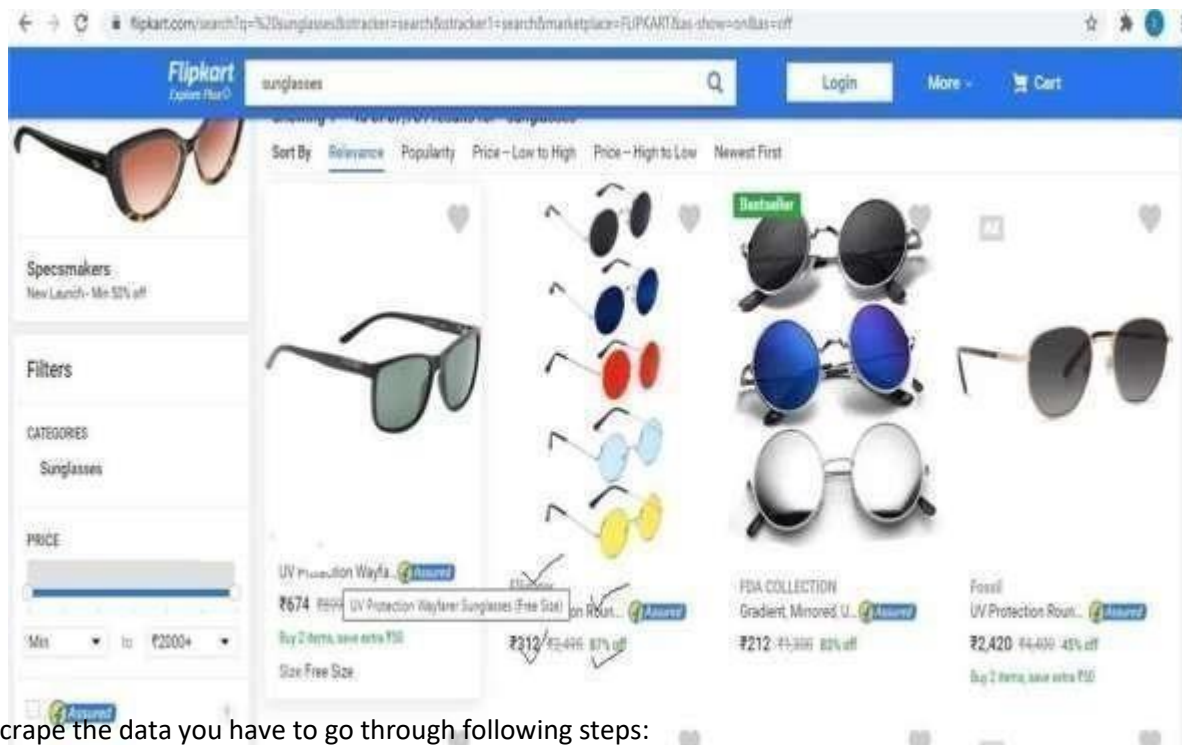

1. first get the web page <https://www.shine.com/>
2. Enter “Data Scientist” in “Skill, Designations, and Companies” field.
3. Then click the search button.
4. Then apply the location filter and salary filter by checking the respective boxes
5. Then scrape the data for the first 10 jobs results you get.
6. Finally create a dataframe of the scraped data.

Note: All of the above steps have to be done in code. No step is to be done manually.

Q4: Scrape data of first 100 sunglasses listings on flipkart.com. You have to scrape four attributes:

6. Brand
7. Product Description
8. Price

The attributes which you have to scrape is ticked marked in the below image.

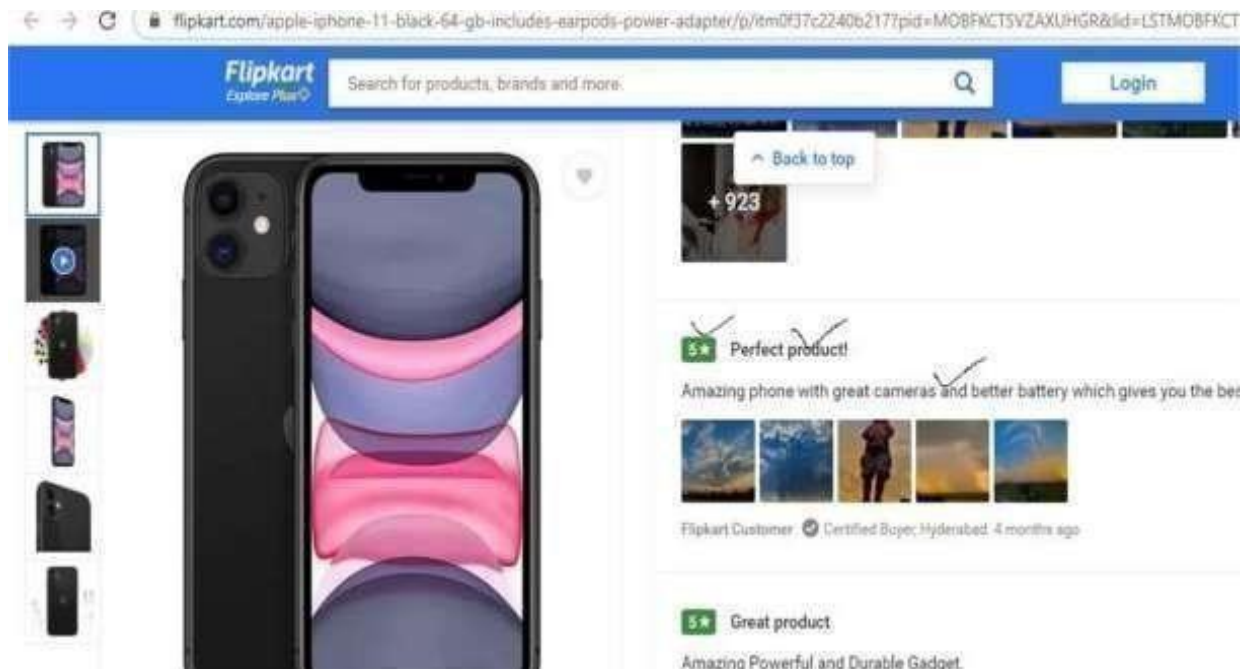

To scrape the data you have to go through following steps:

1. Go to Flipkart webpage by url : <https://www.flipkart.com/>
2. Enter “sunglasses” in the search field where “search for products, brands and more” is written and click the search icon
3. After that you will reach to the page having a lot of sunglasses. From this page you can scrap the required data as usual.

4. After scraping data from the first page, go to the "Next" Button at the bottom other page , then click on it.
5. Now scrape data from this page as usual
6. Repeat this until you get data for 100sunglasses.

Note: That all of the above steps have to be done by coding only and not manually.

Q5: Scrape 100 reviews data from flipkart.com for iphone11 phone. You have to go the link:
<https://www.flipkart.com/apple-iphone-11-black-64-gb/product-reviews/itm4e5041ba101fd?pid=MOBFWQ6BXGJCEYNY&lid=LSTMOBFWQ6BXGJCEYNYZXSHRJ&marketplace=FLIPKART>

As shown in the above page you have to scrape the tick marked attributes. These are:

1. Rating
2. Review summary
3. Full review
4. You have to scrape this data for first 100reviews.

Note: All the steps required during scraping should be done through code only and not manually.

Q6: Scrape data for first 100 sneakers you find when you visit flipkart.com and search for "sneakers" in the search field.

You have to scrape 3 attributes of each sneaker:

1. Brand
2. Product Description
3. Price

As shown in the below image, you have to scrape the above attributes.

Showing 40 of 13,910 results for "sneakers"
